

ERIC AYEH BONSTRAH

Software Developer | Flutter & Firebase | Mobile Applications | Technical Troubleshooting

Dubai, United Arab Emirates

Phone: +971 50 801 4653

Email: bonstrahe@gmail.com

GitHub: <https://github.com/bone2020>

PROFESSIONAL SUMMARY

Software developer with hands-on experience building, debugging, testing, and maintaining Flutter/Firebase applications, combined with extensive experience in IT support, technical troubleshooting, incident documentation, team supervision, and operations.

Experienced with Flutter, Dart, Firebase, Cloud Firestore, Cloud Functions, Node.js, REST APIs, authentication, payment-related integrations, Git/GitHub, and AI-assisted software development.

Currently developing **BonePay**, an independent fintech/mobile wallet application, with practical experience investigating application issues, implementing and reviewing changes, validating functionality, and addressing security and transaction-integrity concerns.

Built and maintained multiple software projects, including Flutter/Firebase mobile applications, a Python desktop application, and a responsive business website. Comfortable using AI-assisted development tools while taking responsibility for understanding, reviewing, debugging, testing, and validating implementations.

Strong problem-solving and troubleshooting skills, with experience working independently, documenting technical and operational issues, and handling high-pressure environments.

TECHNICAL SKILLS

- Flutter & Dart
- Mobile Application Development
- Firebase
- Cloud Firestore
- Firebase Authentication
- Firebase App Check
- Firebase Cloud Functions
- Node.js
- REST APIs & API Integration
- Payment Integration
- QR Code & QR Payment Workflows
- Git & GitHub
- Debugging & Troubleshooting
- Application Testing & Validation
- Security-Focused Development
- Transaction & Data Integrity
- AI-Assisted Software Development
- Technical Research & Problem Analysis
- Python
- Tkinter / Desktop Application Development
- HTML / Responsive Web Development

SELECTED SOFTWARE DEVELOPMENT PROJECTS

Shop Afrik

Flutter / Firebase / Node.js / Cloud Functions / E-commerce

GitHub: https://github.com/bone2020/shop_afrik-

- Developed a multi-seller African e-commerce marketplace using Flutter with a mobile-first architecture.
- Implemented structured buyer, seller, and administration application flows.

- Worked with Flutter routing, application state, domain models, status enums, and structured business workflows.
- Designed Firestore-based data structures and security rules for marketplace operations.
- Developed backend Cloud Functions using TypeScript for order creation, payment confirmation, delivery confirmation, refunds, seller approval, role management, and settlement workflows.
- Integrated QR Wallet functionality through an isolated payment integration layer.
- Worked with currency handling, transaction identifiers, idempotency concepts, platform ledger structures, and seller settlement workflows.
- Applied validation and state-transition controls to reduce inconsistent application states.
- Documented architecture, development phases, testing workflows, and future implementation requirements.

BonePay Demo

Flutter / Dart / Firebase / Firestore / Cloud Functions

GitHub: <https://github.com/bone2020/bonepay-demo>

- Built a public Flutter/Firebase portfolio application demonstrating fintech and mobile-wallet concepts.
- Implemented a multi-currency wallet interface supporting USD, GHS, NGN, and KES.
- Developed simulated send-money workflows with validation, fee calculation, confirmation, and transaction recording.
- Implemented QR-based payment-request workflows.
- Added transaction history and transaction-detail screens.
- Integrated Cloud Firestore for demo transaction data.
- Developed a Firebase Cloud Function for demo fee calculation with a local fallback.
- Implemented demo KYC/profile workflows.
- Applied input validation and structured application-state handling.
- Designed the project specifically as a portfolio demonstration; no real financial transactions or customer funds are processed.

Bone Groups Website

HTML / Responsive Web Development / SEO

GitHub: <https://github.com/bone2020/bonegroups-site>

- Developed a responsive corporate website for Bone Groups of Companies.
- Implemented responsive layouts and mobile-friendly presentation.
- Added SEO metadata, canonical URL configuration, Open Graph metadata, and sitemap/robots configuration.
- Structured pages for company information, privacy documentation, and website navigation.
- Worked with Tailwind CSS and web assets to create the site's visual presentation.

Birthday Reminder

Python / Tkinter / Desktop Application

GitHub: https://github.com/bone2020/birthday_reminder

- Developed a desktop birthday-management and reminder application using Python and Tkinter.
- Implemented birthday entry and management functionality.
- Added calendar-based date selection using tkcalendar.
- Implemented upcoming-birthday calculations, age information, and countdown functionality.
- Added CSV-based data storage and management.
- Implemented scheduled reminders and desktop notification functionality using schedule and plyer.
- Worked with cross-platform considerations for desktop notification behavior.

INDEPENDENT SOFTWARE DEVELOPMENT EXPERIENCE

BonePay

Flutter / Dart / Firebase / Firestore / Cloud Functions / Node.js

Independent Software Development Project

- Developing a fintech/mobile wallet application using Flutter and Dart.
- Working with Firebase and Cloud Firestore for application data and backend services.
- Developing and maintaining server-side functionality using Firebase Cloud Functions and Node.js.
- Working with authentication, APIs, payment-related functionality, and application security.
- Investigating and diagnosing software defects and application issues.
- Reviewing existing implementations before making changes and validating fixes through testing and code checks.
- Working with Git and GitHub for source-code management and development workflows.
- Using AI-assisted development tools as part of the development process while independently reviewing, debugging, testing, and validating generated implementations.
- Investigating security and transaction-integrity concerns involving financial operations, concurrency, idempotency, wallet balances, and dispute processing.
- Applying defensive programming and validation techniques to reduce the risk of inconsistent financial state.
- Continuously researching and improving application architecture, reliability, security, and maintainability.

PROFESSIONAL EXPERIENCE

Security Supervisor

We One | Dubai, United Arab Emirates

January 2017 — Present

- Develop and implement security plans supporting safe and efficient day-to-day operations.
- Allocate tasks among security officers to optimize team performance, readiness, and incident response.
- Lead training sessions covering safety procedures, incident reporting, and response protocols.
- Monitor staff adherence to policies and escalate significant incidents to management.
- Conduct after-action reviews to identify operational gaps and strengthen procedures.
- Maintain accurate daily reports, logs, and operational documentation.
- Prepare detailed incident notes, evidence observations, and initial assessments to support investigations.
- Serve as an initial escalation point for sensitive or complex operational issues requiring immediate assessment.
- Respond to urgent operational escalations and coordinate appropriate responses.
- Promote cross-training, communication, and continuous improvement within the team.

Hostel Manager

Abidora Hostel, Central University | Ghana

2011

- Managed daily hostel operations with responsibility for safety, service delivery, and operational continuity.

- Supervised a team of 17 staff, including onboarding, training, performance reviews, and improvement planning.
- Implemented structured documentation for incidents, maintenance issues, and operational reports.
- Identified operational risks and escalated urgent issues for resolution.
- Conducted post-incident reviews to reduce recurring problems and strengthen operational controls.
- Maintained SOPs, staff schedules, guest logs, and compliance documentation.
- Collaborated with administration, maintenance teams, and external vendors to resolve operational issues.
- Developed operational strategies contributing to improvements in reputation, occupancy, and financial performance.

IT Support Technician

Tigo Telecommunications (Millicom) | Accra, Ghana

2008

- Provided IT troubleshooting, diagnostics, and maintenance support across multiple branches.
- Documented technical issues, solutions, and troubleshooting procedures to improve team knowledge sharing.
- Identified recurring technical problems and recommended solutions to reduce downtime.
- Assisted with incident response through log collection, documentation, and escalation of critical issues.
- Performed software updates, system configuration, patching, and hardware repairs.
- Supported user onboarding through system setup, equipment preparation, and technical orientation.
- Responded to after-hours technical escalations to support service continuity.
- Adapted quickly to new systems, applications, and operational requirements.

Radio Presenter & Producer

Maxx Radio | Takoradi, Ghana

2006

- Developed and delivered radio programs requiring research, preparation, and structured communication.
- Reviewed program performance and implemented improvements.
- Developed strong public-speaking, communication, and audience-engagement skills.

EDUCATION

BSc Computer Science — In Progress

UNICAF University

Computer Diploma

NIIT Ghana | 2010

CERTIFICATIONS & TRAINING

- Google Cybersecurity Professional Certificate — In Progress
- Customer Care — NASBA
- Web & Mobile App Development — Udemy
- Broadcasting — RABODF Ghana
- Aviation Security Awareness Training — IATA

PROFESSIONAL STRENGTHS

- Problem Solving & Technical Troubleshooting
- Incident Analysis
- Risk Identification & Mitigation
- Documentation & Reporting
- Independent Work

- Cross–Team Communication
- Process Improvement
- Continuous Learning
- Operational Discipline
- Attention to Detail

LANGUAGES

- English — Fluent
- Akan — Fluent
